CONTENTS

Preface vii

Organizing and Advisory Committees viii

Invited lecture

M. Senna, Incipient chemical interaction between fine particles under mechanical stress – a feasibility of producing advanced materials via mechanochemical routes 3

A. SYNTHESIS AND CHARACTERIZATION

F. Lindner and A. Feltz, Electrophoretic deposition – a method for preparation of semiconducting oxide ceramic layers 13

M. Schultz, St. Grimm and W. Burckhardt, The isoelectric point of pure and doped zirconia in relation to the preparation route 18

C. Ducamp-Sanguesa, R. Herrera-Urbina and M. Figlarz, Fine palladium powders of uniform particle size and shape produced in ethylene glycol 25

I. Voigt and A. Feltz, Reactivity of manganese oxide-doped Y_2O_3-stabilized ZrO_2 31

H.W. Brinkman, G.Z. Cao, J. Meijerink, K.J. de Vries and A.J. Burggraaf, Modelling and analysis of CVD processes for ceramic membrane preparation 37

E.L. Sham, E.M. Farfán-Torres, S. Bruque-Gámez and J.J. Rodríguez-Jiménez, Synthesis of ZrC/ZrO_2 by pyrolysis of modified zirconium alkoxide precursors 45

J. García, A. González, M.J. Sanchis, M.D. Marcos, E. Martínez, F. Sapiña, D. Beltrán and A. Beltrán, Precursor-based synthetic pathways to nanometer $NdNiO_{3-x}$ particles 52

M. Vallet-Regí, C.V. Ragel, J. Ramírez and J.M. Gonzalez-Calbet, Synthesis of mixed oxides by decomposition of polymeric acids 60

A. Galdón and M.C. Guillem, Preparation of mixed oxides $MNdO_3$, with M=Cr, Fe. Comparison of several methods 66

J.L. Pizarro, M.I. Arriortua, L. Lezama, T. Rojo and G. Villeneuve, Synthetic pathways to obtain phosphates and arsenates of Co(II) and Ni(II) related to minerals: magnetic properties 71

P. Barret, L. Ben Allal and D. Bertrandie, Elucidation of reaction process between solid tricalcium silicate and a lanthanum salt solution in connection with the precipitation pH. Extension to other elements 78

M.D. Marcos, P. Amorós, A. Beltrán and D. Beltrán, New tubular transition metal oxoanionic derivatives: a systematic approach to condensed phases of the dumortierite family 87

M.D. Marcos, P. Amorós, A. Beltrán and D. Beltrán, Transition metal derivatives of low oxidation state phosphorus oxoacids: synthetic pathways and structural studies 96

J. Šubrt and J. Tláskal, Mechanically activated reaction of barium carbonate with iron(III) oxide–hydroxides 110

E. Ponthieu, L. Rao, L. Gengembre, J. Grimblot and R.B. Kaner, Solid-state synthesis of aluminum nitride through a metathetical route 116

S. Colque, P. Grange and B. Delmon, Preparation of tungsten carbides on silica – evidence of coupling effects during reduction/carburization of tungsten oxide 122

L. Perier-Camby and G. Thomas, Solid way synthesis of barium aluminate. Kinetic study of the formation of intermediate compounds 128

M. Valigi, A. Cimino, D. Cordischi, S. De Rossi, C. Ferrari, G. Ferraris, D. Gazzoli, V. Indovina and M. Occhiuzzi, Molybdenum (VI) interaction with zirconia surface and its influence on the crystallization and sintering 136

L. Aymard and M. Figlarz, Production of Ag–Pd alloys by mechanical alloying 143

T. Yamamoto, S. Kikkawa and F. Kanamaru, Preparation of new ternary nitrides CaMN (M=Co, Ni) 148

M. Ueda, S. Shimada and M. Inagaki, Preparation of α-Fe_2O_3 balloons and reaction with ZnO powder 154

M. Labeau, B. Gautheron, J. Peña, M. Vallet-Regí and J.M. González-Calbet, Synthesis of pure and Pd-doped SnO_2 particles 159

M. Vallet-Regí, V. Ragel, J. Román, J. Martínez, M. Labeau, A. Varela and J.M. González-Calbet, Synthesis of cassiterite by pyrolysis of an aerosol 164

M. Ocaña, C.J. Serna, J.V. García-Ramos and E. Matijević, A vibrational study of uniform SnO_2 powders of various morphologies 170

M. Amberg and J.R. Günter, Oxides of tetravalent metals, prepared from their sulfides and selenides 178

M. Itoh, A. Matsumoto, O. Sakurada, M. Hashiba and Y. Nurishi, Diversity of $MgAl_2O_4$ formation associated with changes in physical nature of powders 183

M. Hashiba, C. Matsuda, Y. Katayama, O. Sakurada and Y. Nurishi, Promotion of $ZnAl_2O_4$ formation in the presence of Li_3AlF_6 188

R. Furuichi, S. Nakano, S. Shimada and T. Ishii, Effect of preparation temperature and grinding time of α-Fe_2O_3 on its reactivity for $MgFe_2O_4$ formation 195

M. Vallet-Regí, J. Peña, A. Martínez and J.M. Gonzalez-Calbet, Influence of the synthetic method on the TiO_2 texture 201

M.V. Cabañas, J.M. González-Calbet and M. Vallet-Regí, Influence of the synthetic route on the $BaFe_{12}O_{19}$ properties 207

M.J. Saavedra, C. Parada, M.O. Figueiredo and A. Correa dos Santos, Ca–Zr–O system: synthesis and characterization of compounds using several routes of preparation 213

G. Monrós, J. Carda, M.A. Tena, P. Escribano, F. Ribot and C. Sánchez, Vanadium clusters in doped ZrO_2–SiO_2 toughened ceramic composites obtained from alkoxides 218

Invited lectures

S. Bordère, A. Floreancig, F. Rouquérol and J. Rouquérol, Obtaining a divided uranium oxide from the thermolysis of $UO_2(NO_3)_2 \cdot 6H_2O$: outstanding role of the residual pressure 229

A. Rousset, Reactivity of solids and new metastable phases: examples of mixed valence defect spinel ferrites and manganites 236

Plenary lecture

J. Šesták and J. Málek, Diagnostic limits of phenomenological models of heterogeneous reactions and thermal analysis kinetics 245

B. THERMAL DECOMPOSITION

P. Porta, G. Moretti, M. Musicanti and A. Nardella, Copper–manganese mixed oxides: formation, characterization and reactivity under different conditions 257

M.T. Clavaguera-Mora, S. Suriñach, M.D. Baró and N. Clavaguera, Study of phase transformation kinetics: application to non-crystalline solids 268

M. Sturzenegger, H.R. Oswald and A. Reller, Thermochemical reactivity of delafossite-type $AgNi_{0.5}Ti_{0.5}O_2$ and $CuNi_{0.5}Ti_{0.5}O_2$ in O_2 and H_2 274

M.C. Annesini, R. Lavecchia, L. Marrelli, M.L. Jacono, M.C. Campa, G. Fierro, G. Moretti and P. Porta, Reduction kinetics of CuO–ZnO 281

D. Stirling and F.S. Stone, UV-visible-NIR reflectance spectroscopy applied to Cu–Zn hydroxycarbonates and their decomposition products 289

P. Baláž and J. Briančin, Reactivity of mechanically activated pyrite 296

A.R. Landa-Canovas, L.C. Otero-Diaz, L. Botto and I.B. Schalamuk, Electron microscopy study of the decomposition products at 1300°C from jamesonite mineral $FePb_4Sb_6S_{14}$ 301

M. Epple and H.K. Cammenga, The dehydration of lithium sulphate monohydrate investigated with DSC, TG and temperature-resolved X-ray diffractometry – a comparison between three methods 307

S. Shimada and M. Inagaki, A kinetic study on oxidation of niobium carbide 312

L.C. Otero-Díaz, M.J. Torralvo and R.M. Rojas, Thermal behaviour and microstructural characterization of γ-Dy_2S_3 318

F. Gómez-García, J.P. Gómez, J.M. Jiménez-Mateos, S. Vic, J.L.G. Fierro, M.A. Peña and P. Terreros, Mg–Ni–O based OCM catalyst obtained by carbonate precursor method 325

M.G. Salvetti, M. Pijolat, M. Soustelle and E. Chassagneux, Pyrolysis of a polysilazane precursor to SiCN ceramics 332

M. Touboul and E. Bétourné, $LiB_2O_3(OH) \cdot H_2O$ as precursor of lithium boron oxide $LiB_2O_{3.5}$: Synthesis and dehydration process 340

M. Maciejewski, A. Baiker, H. Viebrock, U. Sazama, P.-M. Wilde and A. Reller, Structure and thermochemical reactivity of $Cu(NH_3)_2CO_3$ 346

M. Insausti, R. Cortes, M.I. Arriortua, T. Rojo and E.H. Bocanegra, Alkaline-earth Cu(II) oxalate compounds as precursors of $MCuO_2$ (M = Ca, Sr, Ba) oxides: thermal and spectroscopic study 351

A. Marini, V. Berbenni, V. Massarotti, P. Mustarelli, R. Riccardi, A. Gazzaniga, F. Giordano, G. Bruni and M. Villa, Thermal study of water/β-cyclodextrin interactions 358

F. Rouquérol, Y. Laureiro and J. Rouquérol, Influence of water vapour pressure on the thermal dehydration of lithium sulphate monohydrate 363

Invited lectures

M.J. McKelvy, R. Sharma and W.S. Glaunsinger, Atomic-level imaging of intercalation reactions by DHRTEM 369

A.R. Landa-Canovas and L.C. Otero-Diaz, Transformation of $Mn(Mn, Er)_2S_4$ spinel-type by electron radiation damage at 400 kV 378

C. INTERCALATION AND SOFT CHEMISTRY

Y.J. Li and M.S. Whittingham, Hydrothermal synthesis of new metastable phases: preparation and intercalation of a new layered titanium phosphate 391

G. Dhalenne, F. D'Yvoire, P. Berthet and A. Revcolevschi, Electrochemical oxidation of CO–ZrO_2(CaO) lamellar eutectic structures to form aligned Co_3O_4–ZrO_2(CaO) material: Mechanism and crystallography of the reaction 396

F. García-Alvarado and J.M. Tarascon, New vanadium bronzes $M_yV_2O_5$ (M=Cu or Ag; $0<y<0.85$): Structure and lithium intercalation 401

M.A.G. Aranda, S. Bruque, J.R. Ramos-Barrado and J.P. Attfield, Relation between structure and ionic conductivity in the lithium derivatives, $LiMnXO_4(OH)$ (X=P, As) 407

R. Dronskowski, A quantum mechanical study on the reactivity and acidity of the $LiAlO_2$–benzoic acid soft chemical reaction 411

P.G. Dickens, G.P. Stuttard, R.E. Dueber, M.J. Woodall and S. Patat, Intercalation compounds of some mixed oxides of uranium 417

P. Gómez-Romero, M.R. Palacín, N. Casañ and A. Fuertes, Synthesis of a reduced niobium "blue" with a layered perovskite structure 424

M.C. Blesa, U. Amador, E. Morán, N. Menéndez, J.D. Tornero and J. Rodríguez-Carvajal, Synthesis and characterization of nickel and magnesium ferrites obtained from α-$NaFeO_2$ 429

L. Seguin, M. Figlarz and J. Pannetier, A novel supermetastable WO_3 phase 437

O. García-Martínez, R.M. Rojas, E. Vila and J.L. Martín de Vidales, Microstructural characterization of nanocrystals of ZnO and CuO obtained from basic salts 442

C. Barriga, P. Lavela, J. Morales and J.L. Tirado, Chemical and electrochemical intercalation of lithium into $SnTiS_3$ and $BiTi_2S_5$ misfit layer compounds 450

J.M. Trillo, M.D. Alba, R. Alvero, M.A. Castro, A. Muñoz, J. Poyato, M.M. Tobías and G. Lagaly, Montmorillonites intercalated with Al(III), La(III) and alumina pillars: structural aspects and reactivity 457

T. Tsuchida, Preparation and reactivity of acicular α-Al_2O_3 from synthetic diaspore, β-$Al_2O_3 \cdot H_2O$ 464

N. Soga and M. Senna, Intercalation of cetyl trimethyl ammonium bromide into mechanically activated V_2O_5 xerogel 471

A. Shimizu, T. Tsumura and M. Inagaki, Electrochemical intercalation of lithium into V_2O_5: Effect of host materials 479

A. Boireau, J.L. Soubeyroux, R. Olazcuaga, C. Delmas and G. le Flem, Li intercalation in $Cu^{II}_{0.5}Ti_2(PO_4)_3$: A neutron diffraction study of $Li_{3.5}Cu_{0.5}Ti_2(PO_4)_3$ 484

M.L. Rodríguez, M. Suárez, J.R. García and J. Rodríguez, Intercalation of *n*-alkylamines in α-hafnium phosphate 488

B. Chauvel, P. Bondot, M. de Roy and J.P. Besse, Local environment in mixed valence $VOPO_4 \cdot 2H_2O$ intercalated compounds 494

M. Cantero, M. Martínez-Lara, S. Bruque and L. Moreno-Real, Reaction of niobium phosphate with hydrazine: structural modification 501

E.M. Farfan-Torres, J. Maza-Rodriguez, M. Martinez-Lara and A. Jimenez-Lopez, Formation of silica interlayers in α-zirconium-titanium mixed phosphate and phosphonate 506

J.M. Saniger and N.A. Sánchez, Zeolite 4A reactivity with gaseous fluorine 512

U. Amador, A. Várez, E. Morán and M.A. Alario-Franco, On the motion of lithium in $YBa_2Cu_3O_7$ lithiated materials 518

Y. Soneda and M. Inagaki, Formation and stability of new $FeCl_3$-graphite intercalation compounds 523

O. Kalogirou, G. Haack, B.R. Röhl and W. Gunßer, Mössbauer study of a modified M-type Ba(Sr)-ferrite prepared by ion exchange 528

Plenary lecture

V.V. Boldyrev, Mechanochemistry and mechanical activation of solids 537

Invited lecture

J. Alamo, Chemistry and properties of solids with the [NZP] skeleton 547

D. STRUCTURE, DEFECTS AND PROPERTIES

H.R. Oswald, S. Felder-Casagrande and A. Reller, Structure and properties of perovskite-related Sr–Ru–Ti–O phases 565

J.M. Salazar and F. Tzschichholz, Defect self-organization in two-dimensional lattices under an external loading 570

M. Millares, B. Pieraggi and E. Lelievre, Reaction/diffusion in the Au–In system 575
